

Features of the NetworX NX-SERIES

Optional Xtras

- 16 Zone Expander
- 8, 16, & 48 Zone Wireless Receivers
- 8 Way Auxiliary Output
- Printer Output
- LCD Code Pad Option
- 24 Zone LED Code Pad Options

Product Features

	NX-4	NX-12	NX-16
Independent number of zones	4	12	16
Expandable to a maximum number of zones (a combination of hardwired and/or wireless)	8	16	48
Anti-tamper supervision of all zones (hardwired and wireless)	Yes	Yes	Yes
Individual areas/partitions	1	2	8
Total number of user PIN codes (4 digit)	8	40	99
Maximum number of codepads	8	16	24
LED backlighting of codepad buttons & LCD codepad screen	Yes	Yes	Yes
Codepad tampers	Yes	Yes	Yes
Codepad service messages (English text on LCD/LED indication on LED codepad)	Yes	Yes	Yes
Uni arming (single button arming for full or partial mode)	Yes	Yes	Yes
Home mode/partial mode arming	Yes	Yes	Yes
Automatic arming (and auto partial mode arming)	Yes	Yes	Yes
Re-exit	Yes	Yes	Yes
Real-time event history (maximum events)	185	185	185
Phone line monitor	No	Yes	Yes
Fire alarm verification	Yes	Yes	Yes
Walk test mode	Yes	Yes	Yes
Full supervision of all expansion module and codepads	Yes	Yes	Yes
Warranty	2 Yrs	2 Yrs	2 Yrs

NetworX NX-SERIES

Advanced technology offers the best protection for your family

We understand you really want to do everything you can to safeguard your home & family. The NetworX Security System will help you - It's the smartest move you can make to feel safe and secure. With advanced and reliable technology, and using strategically placed sensors that blend into your home, the NX-Series has you covered in protective security. If an emergency occurs, the system detects it instantly and responds immediately. Although it is highly sophisticated, the NX-Series

is remarkably simple to operate, securing your home with push button ease. You can also install modules which add special capabilities to your system, like opening a garage door or controlling lights and heating.

It's easy to see why the NX-Series is one of the best investments you can make. It guarantees performance you can rely on and the security you and your family deserve.

NetworX NX-SERIES

How Your Security System Works:

The NX-Series can use a combination of door and window sensors, glassbreak sensors, and interior motion sensors to detect unauthorised entry. The code pad gives you full control over the system and allows viewing of all devices with ease.

The system can be "Armed" so a loud siren will sound if an intrusion device is activated.

Sensors on doors that are used for entry and exit have a delay time allowing you to leave and re-enter while the system is "Armed". While you are at home, just press the "Partial" button, and interior motion sensors can be bypassed to allow freedom of movement inside your home, while still protecting doors and windows.

We've made the NX-Series the simplest security system to operate

EMERGENCY KEYS:

These can be programmed to contact fire, ambulance, or police personnel via a 24 hour control room if an emergency occurs. Just press and hold the button for 2 seconds.

FUNCTION KEYS:

Five specialised buttons perform the most common functions with one touch.

ON:

Turning your system on is as easy as pressing this button.

PARTIAL:

Press this button to arm your system & automatically bypass selected interior motion sensors to allow freedom of movement within your home. eg secure downstairs & stay upstairs.

EXIT:

This button extends your exit time, when you need to go back inside but don't want to turn the system off and back on.

BYPASS:

Temporarily turns off detection devices. Individual detectors can be turned off for flexibility eg. a guest room in use.

CHIME:

This button turns the "Chime" feature on & off. When it is on, a pleasant ding-dong sound will let you know that an outer door or window has been opened.

* Optional LCD Key Pad

Advanced Wireless Technology Option

...because sometimes it's impossible to run wires for the sensors needed to provide complete security.

That's why for these specialised installations, the NetworX NX-Series offers a wireless receiver and a selection of wireless security sensors. Designed to compliment the NX-Series security system, this full line of wireless equipment allows you to tailor a security system to your exact needs.

Motion Sensors:

These wireless infrared motion detectors provide an extra margin of safety by sounding the alarm & signalling for help when an intruder is detected in your home. Without the need for wires, they can be placed anywhere they are needed for additional security. A Pet Immune version is available so you can keep your pets inside, without them activating the alarm.

Door/Window Sensors:

Just add a sensor to any door or window in those hard-to-reach places that need protection. There is no wiring required, so these reliable sensors are on guard in just minutes.

They can be placed on safes, medicine cabinets, gates, or any restricted areas of your home.

Smoke Sensors:

They offer the best life safety protection you can get because they detect the most dangerous type of fire - the slow, smouldering fire that creates a lot of deadly smoke.

These advanced sensors sound the alarm at the first sign of smoke, giving occupants time to escape. The NX panel will also send out a signal so the authorities can respond quickly.

The Key to Convenience...

If you want control that's always right at your fingertips, the optional 2 or 4 button keychain remote is for you. Carry it around in your pocket or purse like your car alarm, and you have a simple, handy way to operate your NX system. For personal security, the remote serves as a panic button that will activate a siren to help scare the intruder or attacker away. In an emergency, just push two buttons simultaneously and a signal goes out to a monitoring station so help can be called. Another option for personal protection is the water-resistant pendant panic sensor, often used for monitoring medical conditions. You can wear it all the time, even in the shower.

And you can take your investment with you if you move.

* Manufacturer recommends maximum range of 300m open air
